

Surge Isolation Pod

Custom Engineered Isolation Environments

Custom Concept Solutions

Simplex has been adapting our products to meet your needs for more than 40 years. With the introduction of the Surge Isolation Pod, Simplex is solving hospital overflow issues that have developed around the world. The Surge Isolation Pod is a novel and effective solution that isolates patients while protecting healthcare personnel from airborne infectious diseases. Our isolation pod is deployed with a HEPA fan/filter unit to provide surge isolation capacity in any environment. Whether its deployed in traditional patient rooms or triage stations, the Surge Isolation Pod will protect your staff while they provide the care your patients need.
